INDUSTRIAL TIRE CHANGE

The first cordless 1/2" Impact Wrench with 2 shut off positions in forward. 1150" Nm Power in reverse

- · 4 settings in forward, to be set up with the touch pad on the backside of the tool
- · Slow mode to approach without impacting (hand tightening around 4-5 Nm)
- · Fast mode to tighten wheels close to recommended torque without overtightening (around 70 Nm)
- 50%: around 580 N
- 100% of maximum torque around 1150+ Nm
- 1 setting @ full power in reverse 1150+ Nm

Most powerful 1/2" tool on the market in its class

CP8849 8941088490

> forgue Limited in forward and Extreme torque in reverse

- · 1/2" composite impact wrench
- · One handed forward/reverse
- Full power in reverse: 1300 Nm maximum real torque in reverse
- · 3 positions in forward: Low 245 Nm - Medium - 650 Nm - High 990 Nm

117⁄00 ₽

CP7748TL 8941077484

CP7748TL-2 8941077485

- · 1/2" composite impact wrench
 - · One handed forward/reverse
 - · 2 setting positions : one in Reverse and one Torque Limited in forward
 - 90/100 Nm in torque limited position in forward
 - 1,250 Nm of maximum torque in reverse

11700 p

Great Performance and Durability

- 900 Nm max in reverse
- Twin hammer mechanism and steel motor
- · Well balanced minimizing wrist
- Ergonomic handle fits perfectly in the hand
- Suited for all maintenance applications

1400 =

- 1300 Nm maximum real torque in reverse
- · Weight: 1.8 kg
- · Length: 171 mm length
- Aluminum alloy front housing
- · Composite housing
- · 2 positions in reverse: max and lower torque
- · 2 position in forward: max and low torque

Lightweight electric polisher with great precision

Precise control and flexibility Smooth operation Operator comfort

- 6" (150 mm) electric polisher
- · Compact and lightweight tool
- · Electronic power regulator
- Unique and durable gearing for high spindle torque
- · Multi-position side handle
- · 4 m heavy duty cable
- Free Speed: 500-2500 RPM
- Net weight: 2.1 kg
- Power: 1.2 kW

3600 b

Powerful & efficient for a wide variety of applications

- M14 spindle thread
- · High quality bevel gears & Governed motor
- · Robust steel keyless adjustable wheel rotative guard
- 1.1HP 840 W
- 1000 hour service interval
- · Streamline CP Safety Lever
- Free speed: 12 000 rpm
- Length: 270 mm

Ultra compact 1/27 wrench, easy to use and durable

- 625 Nm Max. torque
- · Steel front cover
- & Aluminum body
- · One hand operation forward reverse by either left or
- · right handed users
- · 3 setting positions
- Only 4.4" long
- Jumbo hammer

1500 ₽

- Accuracy: 4% according to EN ISO 6789:2003 specifications
- Long-lasting accuracy up to 25000 cycles
- Durable: Reliability of the mechanism up to 25000 cycles
- Robust: 54 teeth fixed pear head ratchet with quick socket release
- Comfort: Black aluminum handle resistant to common chemicals in workshops
- · Compact: To work in restricted areas
- Fine scale graduation
- Sensitive & sound signals when reaches the torque
- Provided with ISO 6789 calibration certificate
- Provided in a protective blow molded case

Robust and Fast Lifting Wheel Dolly

- · Adjustable and sliding arms to wheel diameter from 545 to 1280
- · 2 ball bearing rollers for twin wheel trucks
- · Chain attachment for safe balance during removal and transport
- Sturdy metal frame
- · Capacity: 700 kg

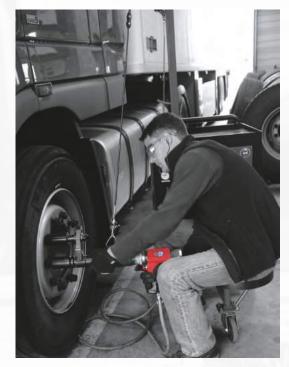

112000 ₽ 8941087700

Chicago Pneumatic's BlueTork CP7600 nutrunner series is a reliable and ergonomically designed tool, when used in a comprehensive wheel preparation process that offers a unique torque control solution. The BlueTork nutrunner can tighten wheel nuts to a precise specification without using impact force. It is the only non-impact tool with a shut-off nutrunner available on the market for fleet maintenance applications.

The BlueTork nutrunner provides high user-comfort when handled, and can reduce maintenance issues. Since the tool uses continuous driving force, instead of impact force, it is guiet at 79dBA, with vibration of less than 2.5m/s.

The BlueTork nutrunner enables operators easily to re-set torque for each use, providing accurate, precise tightening to the original equipment manufacturer's guidelines. The shut off valve controls the tightening process, while the torque reaction is taken by a reaction bar. The tool uses a dual motor setup which provides initial run-down at 100 rpm (50 ft.lbs) to quickly snug the nut, while the second motor rotates at 8 rpm to deliver the final specified torque.

The BlueTork nutrunner is available in four versions (of 7 models) for maximum user choice: the CP7600 with one torque setting in forward only; the CP7600R with one torque setting with forward and reverse; the CP7600-4P which features four torque settings in forward only; and, the CP7600R-4P, featuring four torque settings with forward and reverse. Some versions can also be specified with an extended gearbox to reach deeper bolts. In addition to easy handling, the CP7600 series features a simple swing bar reaction mechanism for easy alignment and quick operation.

- 900 Nm maximum real torque in reverse
- Weight: 6-9.1 Kg
- · Air shut off at preset torque
- · Ideal for Truck and Bus lug nuts
- Almost no vibrations
- · Two motors for fast rundown

INDUSTRIAL IMPACTS

Industrial performance and power

The most productive 1+1/2" with unbeatable power and erronomics

- · Extremely comfortable handle and adjustable support handle
- · Extremely low lateral vibrations for best comfort and safety
- · Working torque range forward: 815-2710 Nm
- · Maximum torque in reverse: 4880 Nm
- · Free Speed: 3500 rpm
- · 960 blows/minute
- · Length: 420 mm

Powerful, Robust & Comfortable 1-1/2" Impact for Industrial Maintenance

- · Durable twin hammer clutch with oil bath
- · Robust aluminum body & clutch housing
- · Reversible D-type side handle
- · Maximum torque in reverse: 3900 Nm
- Free Speed: 4300 rpm
- · 850 blows/minute
- · Length: 440 mm

Compact, robust and powerful impact for industrial maintenance applications

- · Length: 222 mm
- Weight: 5,5 and 5,6 Kg

4300 =

The Super Industrial 177 with renewed design

- · Operator comfort and control even at VERY high torque
- · Progressive torque thanks to the 2-Jaw clutch
- · Working torque range forward: 1220-2440 Nm
- · Maximum torque in reverse: 3790 Nm
- · Free Speed: 3500 rpm
- · 1020 blows / minute
- · Length: 360 mm

How to set up your air line correctly After all, pneumatic tools need air to work!

There are 3 simple steps to make sure your air line installation is providing the right pressure and that your accessories selection is correct, so you can ultimately work productively. It does not take long and it is something you can easily do yourself using our self-diagnostic checklist.

3 steps to check that your air line is set up correctly: it's as easy as 1, 2, 3...

Step 1: Calculate if there is an air pressure drop between the FRL and the tool.

In air tool installations most of the pressure drops occur between the pipe-end and the tool.

- · First, read the FRL gauge value
- · Secondly, measure the dynamic pressure at the tool's inlet
- . Then, calculate the difference between the two values to see if there is a drop in air pressure between the FRL and the tool

Step 2: Identify where pressure is being lost by checking that your accessories have been selected and installed properly.

There are various points to inspect, the main ones being: at the tool inlet, the couplings/nipples and hose connections, as well as the FRL. To avoid pressure drops you want to make sure that:

- Accessories have the correct diameters and thread sizes/types
- The hose is not longer than needed
- · Clamps are properly tightened

Step 3: Final measurements and adjustments.

When it comes to air pressure, higher is not always better!

Once you are confident that all accessories have been selected and installed correctly,

measure once more the dynamic pressure at the tool's inlet.

You can then adjust accordingly the FRL regulator to ensure you get a reading of 90 psi / 6.3 bars at the tool inlet.

IS YOUR AIR TOOL INSTALLATION RIGHT?

Download our free technical guide at https://campaigns.cp.com/is-your-air-tool-installation-right

DRILLS

CP1114 Series OUR LATEST INDUSTRIAL DRILL SERIES

Powered by a 0.5HP (410W) motor, these reversible pistol drills are perfect for drilling, tapping and reaming in industrial production and maintenance applications. Available in 4 speeds: 500, 900, 2600, and 4000 RPM the CP1114R cover a large variety of applications, from aluminum to stainless steel.

The unique CP Ergo Wing design allows a comfortable and safe grip for operators while the three full caged planetary gears offer a high level of durability, with 800 hours service intervals. As a result a best in class run out (below 0.15mm) is achieved for high precision

■High capacity, high quality and quick height adjustments

HIGH QUALITY & STRENGTH Welded steel construction to prevent distortion or twisting

FUNCTIONAL

- Height adjustment pin is attached to stand to prevent loss
- Handle welded to base for easyadjustment and positioning

CONVENIENT

Large v-shaped saddle to support and to position vehicle frame

HIGH CAPACITY

17.71 in. – 450 mm for the 12T model 19.68 in. – 500 mm for the 20T model

QUICK HEIGHT ADJUSTMENTS

Multiple hole locations in support tube, supplied with strong safety pin

HIGH STABILITY

Wide, square base

Features

2 holes in each foot to fix in the floor Steel frame

2 step stroke system

Large gauge measuring short and metric tons Delivered with 2 V blocks

Easy to use handle with rubber grip

Delivered with a quick chuck and 8 punches

■ High Capacity and Great Durability Air-hydraulic Jacks

Ideal for easily accessing lifting points on low chassis trucks

Features

Air powered piston

Includes 2 extensions for higher lifting

- Stored on handle for transport

Piston and pump

Anti dust seals for high durability

Convenient joystick controls

Cylinder mounted carrying handle

1.3 m / long handle bar (1 piece handle) allows easy access to

controls when fully positioned under vehicle

Handle bar locks in 3 positions: 45°, 90° & 180°

Large & soft rubber wheels

Easy-to-use single wheel dolly

- Adjustable arms
- · Sturdy & handy assembly aid for various types of wheels
- · Stop rollers on the rear side that avoid pushing the wheel onto the frame
- Ergonomic handle with rounded & soft safety grip
- · Capacity: 250 Kg

AIR FUSES

In a working environment, operator safety matters as much as productivity does. When a fitting comes loose from a pressurized hose or the hose is damaged (sometimes severed completely), the hose starts to blow an excessive amount of air in an uncontrolled way, causing whiplash. This can cause injury and damage to the work place and environment. A way to avoid this is to use an air fuse.

Fixed between the FRL and the hose, this small accessory will prevent from hose whiplash. It quickly shuts off the supply and resets automatically as soon as back pressure in the line downstream is restored.

How to select your air fuse?

The air fuse should always be selected according to 3 values:

- Maximum tool air consumption (see catalog value),
- Hose diameter and length*,
- Air line thread type

Tools max. air consumption @6.3 bars / 90 psi

Inside hose diameter / Hose maximum length

Air line thread type

Since 1901 the Chicago Pneumatic name has represented reliability and attention to customer needs, with construction, maintenance and production tools and compressors designed for specific industrial applications. Today, Chicaco Pneumatic. has a global reach, with local distributors around the world.

Our people start every single day with a passion to research, develop, manufacture and deliver new products that are meant to meet your needs not only today, but tomorrow as well. To learn more, visit **www.cp.com**.

CHASING THE CHAMPIONSHIP

Chicago Pneumatic is proud to sponsor Indy Pro Series 2000 Racer Rasmus Lindh.

This May Rasmus Lindh took a big step towards the championship in Indy Pro Series 2000 with a big win at Indiana Motor Speedway.

In one of the greatest racing weekends of his life Rasmus Lindh swept the Friday and Saturday races in the Indy 2000 Pro presented by Cooper Tires series during the INDYCAR Grand Prix. After winning both pole positions and races on the weekend Rasmus celebrated his clean sweep with a trophy raised above his head.

Rasmus entered the American racing scene last year and had already collected an impressive amount of wins in Europe with two National Championships, a first place in the WSK Series in Mini 60 and a fifth place finish in the World OK Senior Championship.

In 2018, the 17 year old made the move to North America and his first season of open-wheel racing. In his debut USF2000 season, the youngster went on to score three pole positions and five podiums en route to second place in the championship.

Chicago Pneumatic congratulates Rasmus Lindh on his success and wish him a great future racing season.
